ARC WIRELESS SOLUTIONS, INC. INTRODUCES THE NEWLY EXPANDED FREEDOM ANTENNA® PRODUCT LINE, INCLUDING THE FREEDOM BLADE™

Wheat Ridge, Colorado January 7, 2008 – ARC Wireless Solutions, Inc.’s (NASDAQ: ARCW) Wireless Communications Solutions Division (“ARC”)–The Wireless Communications Solutions Division of ARC Wireless Solutions, Inc., will be introducing, at the 2008 International CES Trade Show, the expanded Freedom Antenna® Product Line which includes the new Freedom Blade™. The Freedom Antenna® Product line also includes several individually packed adapters for the more popular cell phones and a Freedom Clip Pack that has a laptop clip and a vent clip for cars that is compatible with both the Freedom Antenna® and the Freedom Blade™.

The Freedom Blade™ is a smaller, more compact wireless signal booster that uses the same patented technology as the Freedom Antenna®, attaches to cell phones, PDA’s and laptops and can be used at home or while working or traveling.

The Freedom Cruise™ is the third antenna in the product line but is specifically made for automobiles. It is a magnetic mount antenna that mounts to the top of your vehicle while connected to your cell phone, PDA or laptop.

In addition to the added antennas to the line, there will be six adapter packs for the more popular cell phones and PDA’s on the market today. The adapter packs include the Universal Adapter which works with many cell phones and laptop air cards, the Motorola RAZR™ Adapter, the Motorola KRZR™ Adapter, the Motorola Q™ Adapter, the Palm Treo™ Adapter for the 650, 700p and 700w|wx and the Palm Treo™ Adapter for the 750 and 755p.

“As the wireless market expands, ARC is helping the consumer by making several antenna and adapter options available,” says Todd Schaefer, Vice President of Sales. “We hope to continually survey the market and create products that make life easier for those who have wireless signal issues.”

The Freedom Antenna® is the world’s first portable personal antenna with broadband capability to provide clearer reception for cellular phones and other wireless devices by extending the range and reducing dropped calls. Utilizing patented technology, the Freedom Antenna® is compatible with all major wireless carriers and technologies and offers high performance in a slim package for both fixed and mobile use.

The Freedom Antenna® Product Line will soon be available through ARC’s extensive network of value-added resellers, distributors, and retailers. Further information is available on our website, www.freedomantenna.com.

About ARC Wireless Solutions, Inc.

ARC Wireless Solutions, Inc. is involved in selective design, manufacturing, marketing and selling of a broad range of wireless components and network products and accessories. The Company develops, manufactures and markets proprietary products, including Wi-Fi® and WiMAX™ panel antennas, mobile GPS, and cellular antennas, as well as base station antennas (for cell phone towers), through its Wireless Communications Solutions Division; it designs, manufactures and distributes cable assemblies for cable, satellite and other markets through its Starworks Wireless Inc. subsidiary; and it negotiates and manages its contract manufacturing relationships through its ARC Wireless Hong Kong Ltd. subsidiary. The Company's products and systems are marketed through the Company's internal sales force, OEMs, reseller distribution channels, retail, and the Internet. ARC Wireless Solutions, Inc., together with its Wireless Communications Solutions Division and its Starworks Wireless Inc. subsidiary, are headquartered in Wheat Ridge, Colorado. The Company's Hong Kong subsidiary is located in Kowloon, Hong Kong.
